

## Using Culvert Cost iPad application to Edit Records

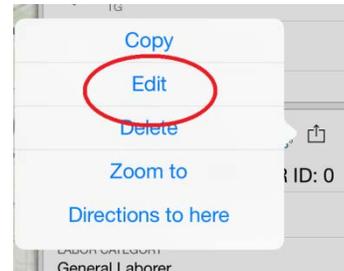

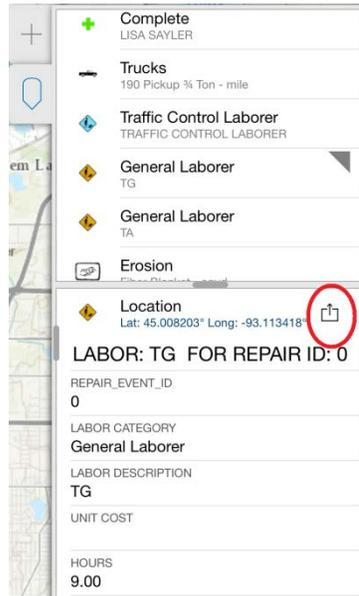

1. Turn off Culvert Layer to reduce clutter and see repairs

2. Zoom into repair and tap on screen to bring up panel on right with Repair and LEM records
3. Touch the records for labor, equipment, materials or repair that are listed on the top part of the panel and review the details for each in the bottom part of the panel

4. When find a record that needs editing, touch the Special Menu tool to put the record into Edit mode.

5. Edit the appropriate data, then click on Done

6. Click on Update to update the record in the database
