RE: Interstate 494 (I-494) Rehabilitation Project
Cedar Island Lake Linear Park

Dear Resident,

Very soon the Minnesota Department of Transportation (MnDOT) will begin a reconstruction project on Interstate 494 between I-394 and the I-94/494/694 interchange. The project includes pavement repairs, bridge and interchange ramp maintenance repairs, a third general purpose lane between Highway 55 and East Fish Lake Road, noise walls, and a potential storm water pond.

As part of the I-494 project, MnDOT plans to use approximately 1.7 acres of property from Cedar Island Lake Linear Park along the west shore of Cedar Island Lake to construct a storm water pond (see attached map). The purpose of the storm water pond is to provide water quality treatment of runoff from the highway before it is discharged to Cedar Island Lake. Constructing the storm water pond requires us to remove trees from Cedar Island Lake Linear Park. The trail connection between Teakwood Lane and East Fish Lake Road will be maintained.

Additional information about the project and the proposed impacts to Cedar Island Lake Linear Park are available at www.dot.state.mn.us/metro/projects/i494plymouth/documents.html.

We are hosting a public open house to provide you with information about the proposed impacts to Cedar Island Lake Linear Park and to answer your questions. The open house is on Wednesday, July 30, 2014 from 4:30 to 6:30 p.m. in the council chambers at Maple Grove City Hall, 12800 Arbor Lakes Parkway.

Comments regarding proposed impacts to Cedar Island Lake Linear Park must be submitted on or before **Friday, August 15, 2014** to Chad Casey, MnDOT Project Manager (contact information provided below). Comments will become part of the official record and will be considered when making future project related decisions.
